Executive Overview

Innovative technology executive with over 20 years of experience leading IT, engineering, and operations teams across global enterprises. Expert in driving digital transformation, automation, and AI strategy to deliver measurable business value, enhance security, and optimize costs. Recognized for aligning technology with organizational goals and building high-performing teams that foster innovation and continuous improvement.

"I believe in empowering people through technology, removing friction, automating what doesn't need human touch, and focusing energy where it creates real value."

Core Strengths

- **Executive Leadership:** AI & Automation Strategy, Digital Transformation, Cloud Architecture
 - **Security & Compliance:** GovRAMP/StateRAMP, SOC II, HITRUST, Zero Trust, RBAC
 - **Operational Excellence:** Predictive Analytics, IT Governance, Lifecycle Management, Vendor Operations
-

Professional Experience

120 Water | Head of Infrastructure, IT & Security

March 2026 – Present

Lead the strategic integration of security and operations to support company growth and customer trust. Directing the initiative to achieve GovRAMP/StateRAMP authorization,

scoping and deploying fully compliant architectures to unlock critical SLED market segments.

- **Government & Compliance Readiness:** Spearheaded GovRAMP/StateRAMP authorization, deploying 30+ new IT/Security policies within the first 60 days.
- **Identity & Security Hardening:** Deployed enterprise-wide SSO/SCIM via Okta, establishing RBAC and eliminating orphan accounts.
- **Operational Efficiency:** Automated core onboarding/offboarding workflows, reducing time-per-ticket by 45 minutes.
- **Vetted Infrastructure Leadership:** Active member of InfraGard (FBI public-private partnership), maintaining cleared status to support the protection of critical infrastructure.

IronCircle | Head of Information Technology

March 2022 – December 2025

- **Digital Transformation:** Modernized IT operations using Ansible, cutting manual workloads by 50%+ and reducing ticket volume by 36%.
- **Cost Optimization:** Implemented MACH architecture, improving scalability while reducing license costs by \$800K annually.
- **AI Innovation:** Deployed AI-powered ticket ingestion and guided resolutions using OpenAI, Gemini, and Anthropic models.
- **Culture Building:** Built global teams achieving 4.98/5 NPS satisfaction scores.

Deft | Director of Engineering Operations

2020 – 2022

- Re-engineered operations, implemented an automation-first culture, and turned IT into a strategic enabler and revenue generator.

KAR Global | Senior Manager, Enterprise Operations

2019 – 2020

- Delivered \$600K in cost savings by automating event management and implementing predictive monitoring systems.

NetEnrich | Senior IT Operations Manager

2015 – 2019

- Led 37 engineers managing multi-tenant IaaS, SaaS, and PaaS. Implemented predictive analytics achieving 80% outage and 95% hardware failure prediction accuracy, reducing alert noise by 50%.

Rolls-Royce | Regional IT Strategy & Delivery Manager

2007 – 2015

- Delivered \$14M annual savings through infrastructure modernization and agile transformation across the Americas.
-

Education & Certifications
